SKILLS

- Solid understanding of the MERN stack (MongoDB, Express.js, React.js, Node.js)
- Proficient in HTML, CSS, and JavaScript.
- Basic knowledge of database management systems, particularly MongoDB.
- Version control systems such as Git and GitHub.
- Familiarity with testing and debugging concepts.
- Strong problem-solving and analytical skills.
- Excellent communication and teamwork abilities.
- Enthusiasm for learning and keeping up with the latest web development trends.

RELEVANT COURSEWORK

- Web Development: Studied the fundamental concepts of web development including HTML, CSS, JavaScript, and responsive design.
- Database Management Systems: Learned the basics of database systems, SQL queries, and database design principles.
- Front-end Frameworks: Gained hands-on experience with React.js and its ecosystem, including state management with Redux and component-based architecture.
- Server-side Development: Explored Node.js, Express.js, and RESTful API development for creating scalable and efficient server-side applications.
- Full-stack Development: Integrated front-end and back-end technologies to build complete web applications using the MERN stack.
- Developed an understanding of software development methodologies, version control, and best practices in coding.
